SUMMARY

Software developer with real production experience building RESTful APIs and full-stack web applications using Laravel, Node.js, React, and Shopify at an international, Israeli-owned agency. Comfortable across the full request lifecycle, from database design and API architecture through caching, authentication, and the frontend. Strong interest in backend development and practical system design, and currently growing into AI-powered systems, RAG pipelines, and Shopify app development.

EXPERIENCE

Junior Software Developer, MATAT Web Application

Ongoing

Kathmandu, Nepal

- Build and maintain full-stack features across Laravel, Node.js, React, and Shopify inside a live production codebase that serves international clients.
- Develop Laravel admin panels with role-based access control using Blade templating, middleware, Eloquent ORM, and MySQL.
- Work across relational and document databases, using MySQL with Eloquent ORM for structured data and MongoDB with Mongoose for document-based storage.
- Integrate Cloudinary for image upload, transformation, and rollback logic inside a production Node.js, Express, and MongoDB backend with full CRUD support.
- Extend into custom Shopify app development, and explore Docker for containerization to make releases more predictable.

Software Development Intern, MATAT Web Application

Earlier

Kathmandu, Nepal

- Joined the team as an intern, learning the production codebase and contributing to full-stack features under guidance.
- Built responsive React frontends with reusable components, React Router, hooks, and Tailwind CSS for a smooth experience across devices.
- Gained hands-on Shopify exposure through store setup, product configuration, and discount rule logic.
- Picked up core backend, database, and authentication patterns from the ground up, which carried directly into the developer role.

Admin Officer / Sourcing Assistant, Sherpa Adventure Gear Pvt Ltd

5 Months

- Managed vendor purchase orders, UPC and carton sticker printing, and warehouse inventory tracking through AIMS software.
- Coordinated international courier dispatches with DHL and FedEx, handled shipment invoicing, and supported the sourcing team with cost-sheet preparation and supplier communication.

Admin Officer / Procurement Assistant, Kalinchok Security Pvt Ltd

2 Years

- Prepared and submitted company bids for national tenders and RFPs, and managed RFQs, vendor quotations, PO creation, and supplier negotiations.
- Produced weekly procurement and expense reports, processed vendor invoices, and kept financial and administrative records organized.

Documentation Officer / Admin Officer, Kalinchok Manpower Pvt Ltd

2 Years

- Handled end-to-end overseas worker deployment documentation, including passport processing, work permits, and government approvals for Gulf countries.
- Administered SoftGrih software for candidate database management, visa status tracking, and deployment reporting with full audit compliance.

SYSTEM DESIGN & BACKEND CONCEPTS

- JWT authentication with access and refresh token rotation
- Session management and httpOnly secure cookies
- Local storage and cookie-based client state
- Redis caching with TTL and cache invalidation
- Offset and cursor-based pagination
- Rate limiting and request throttling
- npm package and dependency management
- Middleware for auth, validation, and error handling
- CSRF protection and bcrypt password hashing
- Database indexing for faster queries
- Guest cart persistence and merge on login
- File uploads with Multer and Cloudinary, with rollback
- REST API design and clean route structure
- CORS configuration and request handling
- Environment variables and secrets management
- Webhooks and event-driven handling

PROJECTS

Vintuna E-Commerce (Final Year Project)

Node.js / React / MongoDB

github.com/1AndOnlyArbeen/Vintuna_Ecommerce

- Full-stack e-commerce platform with separate Admin and User roles, protected routes, Khalti payment integration, and discount logic.
- Smart cart merging for guest users via local storage, plus pagination across all listings and admin views.
- Transactional email through Resend for order confirmations, payment receipts, and account notifications.
- Locally run Llama 3B integrated as an AI chatbot that answers customer questions about products and store information.

E-Commerce App (Laravel)

Laravel / Blade / MySQL

github.com/1AndOnlyArbeen/e-commerce

- Role-based access with separated Admin and User flows, middleware-protected routes, and scoped dashboards.
- Smart cart merging on login to sync guest and user carts without losing items.
- Full auth flow built on sessions, cookies, and CSRF protection, with Eloquent ORM relations and pagination for efficient product and order queries.

Shakti (Ongoing)

Node.js / React Native / MongoDB

github.com/arbinthapamagar/Shakti

- Architecting a women-first EV ride-sharing platform with real-time GPS tracking using React Native, Node.js, MongoDB, and Socket.io.
- Designing a driver ownership model where the EV is registered in the driver's name from day one, with automatic EMI deduction until full ownership.
- Building a subscription and multi-revenue system with Khalti and Stripe, covering ride cuts, rentals, and B2B contracts for child pickup and grocery delivery.
- Implementing AI route optimization and safety features with LangChain.js, and a multi-role REST API for admin, driver, and passenger with automated financial workflows.

CURRENTLY LEARNING

- RAG pipelines and AI agents, github.com/arbinthapamagar/BOT
- Shopify app development and CRUD operations, github.com/arbinthapamagar/shopify-learning

TECHNICAL SKILLS

Backend: Node.js, Express.js, Laravel, REST API design, middleware, pagination, rate limiting
Frontend: React.js, Tailwind CSS, Blade (Laravel), HTML5, CSS
Auth & Security: JWT, bcrypt, sessions, cookies, refresh token rotation, role-based access, route protection, CSRF
Caching & Performance: Redis (caching, sessions, rate-limit store), TTL and cache invalidation, DB indexing
Databases: MongoDB, Mongoose, MySQL, Eloquent ORM
File & Storage: Multer, Cloudinary, local storage, cookie storage
E-Commerce: Khalti API, Stripe, Shopify store and discount rules
Tools & Testing: Git, GitHub, Postman, VS Code, Docker (learning)
AI: LangChain.js, locally run Llama 3B, RAG (learning), Claude AI

EDUCATION

Texas College of Management and IT	Undergraduate, 8th Semester
Broadway Infosys	MERN Stack Training
Prolific Secondary School / College	Higher Secondary
Sainik Awasiya Mahavidyalaya, Pokhara	Secondary School
